

ENVIRONMENTAL POLICY 2023

Acron Group recognises its responsibility to ensure the maximum industrial safety of its operations for the health and lives of people and acknowledges its environmental impact in the footprint regions.

● **KEY OBJECTIVES OF ACRON GROUP'S ENVIRONMENTAL POLICY:**

1. Consistently reduce its environmental impact
2. Use the best available technology and equipment
3. Conserve natural resources and energy
4. Continuously improve environmental management practices

● **TO ACHIEVE THESE OBJECTIVES, ACRON GROUP UNDERTAKES TO:**

- Conduct its production operations in accordance with the Russian environmental laws
- Comply with the established standards of permissible environmental impact and environmental quality in the area of its operations
Reduce its impact on the ecosystem by improving reliability, safety and accident-free operation of process equipment
Introduce advanced resource-efficient technologies and equipment that ensure sustainable consumption of natural resources
- Improve employee skills and professional training system in the area of environmental safety and protection
- Assess the potential environmental impact of all new projects prior to their implementation
- Identify the aspects that may affect the environment, assess and manage their potential impact
- Improve the environmental management system
- Encourage the contractors to unconditionally comply with the environmental requirements when working on Acron Group's sites
- Ensure transparency and availability of the information about the Group's environmental efforts.
